- UNIQUE TAPE TENSION CONTROL
- AUTOMOTIVE STYLE OIL FILTER
- MADE IN AMERICA TO HIGHEST QUALITY ISO STANDARDS WITH AMERICAN PARTS AND SERVICE.

Union Special  
INDUSTRIAL SEWING EQUIPMENT

# H.D. TAPE EDGE HEAD

### TESTIMONIAL

" ...The T111 is faster and quieter than any other machine. The pressurized oil eliminates the problems I have with other heads. It sews the straightest and smoothest tapes line I've seen...the rear puller rollers constantly pull the tape perfectly flat and straight."

Mark Walquest, PM Englander/Chicago

### INNOVATION

Union Special set out to create a tape edge head so rugged, so smooth, with perfectly flat and straight sew lines. They started from the ground up, using every piece of technology and expertise from their line of ultra high speed and ultra reliable sewing machines.

In the end, The T111 emerged as the Terminator of Singer 300 class machines, dramatically outperforming them in every measurable category.

With standard bases for popular machines like United and Cash, the gorilla tough T111 is ready to start working for you.
